

Shandong Xiangde Electromechanical Co., Ltd.

Shandong Xiangde Electromechanical Co., Ltd., founded in 2009, is a national high-tech enterprise specializing in the R&D and manufacturing of high-end safety drilling equipment for mining.

With a registered capital of 120 million yuan, the company owns a 36,000-square-meter standardized production workshop and a 5,200-square-meter comprehensive R&D center. It is equipped with nearly 400 sets of modern and intelligent machining, inspection and testing facilities, laying a solid foundation for product research, development and production.

The company has established sound management systems covering quality, environment, occupational health and safety, energy, after-sales service, intellectual property and work safety standardization, all certified by professional authorities. These systems ensure controllable production procedures, safe and healthy working conditions, steady improvement of product quality and reliable application for customers.

Adhering to an innovation-driven development strategy, the company consistently enhances its R&D team, increases investment, actively recruits high-level R&D talent, and engages in in-depth collaborations with renowned universities and research institutions such as China University of Mining and Technology, Shandong University of Science and Technology, Shandong University, and Qilu University of Technology. It has obtained over 100 patents, driving its products toward "customization, specialization, intelligence and sustainability"

Its main products include over a hundred complete sets of equipment and supporting accessories across seven series, such as mining crawler full-hydraulic tunnel drilling rigs, kilometer directional drilling rigs, intelligent mining drilling rigs and hydraulic bolting rigs. Boasting superior product performance and solid reputation, the company's sales network covers major coal mining areas of domestic mining groups, and its products are exported to Russia, Kazakhstan, Canada, Vietnam, Serbia and other overseas markets. The company enjoys wide recognition from clients at home and abroad, maintaining a leading production and sales volume in the industry.

Xiangde electromechanical will take professional marketing as the carrier, intelligent products as the feature, and technology R&D as the support, comprehensively achieving product upgrading, service enhancement, and management improvement. The company remains committed to safeguarding the sustainable development of mining safety.
